One of the best things about LEDs is their flexibility. With countless potential arrangements, LED lighting alloys for dozens of different fixtures and while traditional fluorescent and halogen bulbs are extremely limited in terms of their applications, LED lighting can be designed to suit almost any purpose. Some of the most popular types of LED fixtures are LED downlights due to their efficiency, durability, and safety. If you’re new to the world of LED lighting fixtures, here are some advantages worth taking into consideration:

**Efficiency**
LED downlights and spots use only a fraction of the energy required by traditional lighting solutions. Replacing your existing lights with Province LED lighting fixtures will result in dramatic energy savings.

**Low Maintenance**
LED downlights and spots last longer than their traditional counterparts, which means you spend less money and time on maintaining your fixtures.
GU10 Recessed Downlighters
Erin

FEATURES:
• Aluminium alloy body
